## INTRODUCTION

**'Test Board'** is an online test taking system that allows students to register and attempt for tests based on the courses they have opted for. Post the submission of a test, it allows the students to view their scores, grade and feedback from faculty if any. Students are given the option to select from the available date and time slots for a particular exam to register for the test.

Faculty can also login to the application to set the date and time slots and time duration for a specific course test they teach. They have an option to set the questions and multiple choice options for a particular test.

User needs to first login to the test taking application to perform further activities. User can be 'student' or 'faculty'.

## STUDENT NAVIGATION

- I. When a student logs in successfully, a homepage will appear on the screen, allowing the student to select the appropriate course.
- II. After selecting the appropriate course, student has the following options:
  - Register for a test of the selected course
  - View scores of the selected course
- III. If the user selects first option, a registration view page opens up which allows the user to select the appropriate date and time to attempt the test.
- IV. Test Paper already set by the faculty appear on the student's screen on the scheduled date and time where the student attempts the test paper.
- V. Student has the option select one out of the four multiple choice questions that appears on the test screen.
- VI. After attempting the test paper on time, the student has the option to submit the test / If the time duration of the test over, the application automatically submits the test.
- VII. Student has the option to view the scores by clicking on a 'View Scores' button on the homepage. Student can view the scores, grades and feedback set by the faculty.
- VIII. Student can simply logout if he has completed all his activities.

## FACULTY NAVIGATION

- I. When a faculty logs in successfully, a homepage will appear on the screen, allowing the faculty to select the appropriate course that the faculty teaches.
- II. After selecting the appropriate course, faculty has the following options:
  - Prepare a test paper for the selected course
  - Enter and declare scores of student for the selected course
- III. If the faculty selects first option, a set test paper view page opens up which allows the faculty to set the appropriate date and time slots for the students to attempt the test.
- IV. Also the faculty sets the questions by fetching it from the 'test directory'.
- V. If the faculty selects the option 'Enter and declare scores of student for the selected course', the faculty can fetch the scores of the students by viewing the number of questions attempted right and accordingly set the grades and provide appropriate feedback to students.
- VI. Faculty can simply logout if he has completed all his activities.

**THE END**  
**THANK YOU**
